## RECEIPT PRINTER

PRESS FOR  
RECEIPT

*Display Option Shown.*

The McGann Receipt Printer readers are designed for credit card in/out or credit card on-file applications where a patron receipt is required. The readers utilize magnetic stripe technology and reliable direct thermal printer to provide fast credit card egress with customer receipt. Multiple reader technologies are available to support credit card on-file applications including proximity, AVI, barcode, and contactless smartcard. The readers work with McGann credit card software suite for transaction processing at a variety of clearinghouses.

- Micro-controller driven technology
- 1000 transaction off-line buffer
- Magnetic Stripe reader head provides reliable processing
- Supports standard credit card formats – AE, Visa, Master Card, Discover, Diner
- Supports Low coercivity (LoCo) and High coercivity (HiCo) cards
- Supports ISO, JIS and Custom formats\*
- Standard Track II read head configuration
  - Optional Track I and Track III configurations available
- Automatic switch to standalone mode if communications are interrupted
- Built-in diagnostics test reader performance
- Remote control of gates and peripheral device from McGann Software
- Hard, soft, true or timed anti-passback
- Reader can accommodate 65,000 to 1 million card IDs based on format
- Optional 2-line (20 character/line) LCD display w/LED backlight
